Clarification of Refuelling Connection Time Restrictions

Further to Stewards' Bulletin No. 10, the Stewards clarify the following:

Where a time under "parc fermé conditions" is specified in relation to the minimum refuelling connection times, this applies only to the refuelling nozzle connection itself.

This means that the refueller may not touch the car with the nozzle until the time specified has elapsed.

Other operations (e.g. cleaning windscreens, connecting the earthing lead, etc) may be undertaken as normal during this period in accordance with the applicable regulations.
