# TEAM INFORMATION XML LIVE DATA FEED 2021

Dear Teams;

The data allows you to use your own strategy tools. This service is free of charge to the teams.

The planned infrastructure is depicted below Please note: like last year only 5GHz wireless are available!! Please make sure that your devices support the 5GHz network):

You have two options to connect our network:

1. We'll install some network connection boxes in the Pitlane where you can connect your own network cable RJ45 (maximum length of cable: 85 m) to our network. This will be the safest solution.
2. You can connect to our network also over wireless LAN. However we can't ensure that you receive the WLAN signal anywhere.

The file structure and further details are available in attached manual.

The wireless network access data for this season will be:

SSID: XML_FEED   Network key: TEAMS2021

The IP addresses are assigned automatically. The XML download works via FTP protocol. Recommended programs are filezilla and winscp. The second option is to map network location in windows file explorer.

The login is:

User name	xml
Password	TEAMS2021
URL	ftp://xml-motorsport.sportresult.com
Server Port	21

Data Link for Own Cloud Data from 2018/2019/2020/2021
